Of the 6.3 million acres planted in Colorado in 2011, 5.5 million or 87% were enrolled in crop insurance. Of the insured acreage, 4 million were individual buy-up coverage, with 1.1 million (20% of acres; 34% of premiums) with a buy-up level of 75% or greater, while 143,000 (3%) were in CAT. Only 3000 acres (.06%) were in area plans like GRP or GRIP.

Administrative and Operating Costs

The chart to the left highlights how the cost to the government to administer crop insurance in the state has been drastically cut since 2008, even as total liability within Colorado has increased (from \$900 million in 2010 to \$1.3 billion in 2011).
